JiveX ENTERPRISE PACS

Europe's Best PACS

Now available in Australia & New Zealand

Advantages of JiveX Enterprise PACS at a glance

- Three-time award winner of Europe's prestigious "**Best in KLAS Best PACS (Europe)" 2019, 2020 and 2022**
- Fast, reliable, feature rich and highly customisable
- Efficient and dynamic interrupted workflow features
- Powerful specialty tools such as breast and cardiac
- Teaching lists and conferencing capabilities
- User friendly and intuitive
- 3D Image Reconstruction/Analysis
- Multi-modality viewer with integrated hanging protocols, automatic image registration, image fusion and time navigation.

The core of JiveX Enterprise PACS is Medical Data Management.

JiveX Enterprise PACS is a comprehensive radiology solution that streamlines the complete radiology workflow-from order management to report distribution, teaching and quality improvement.

Users benefit from automated processes which eliminate time-consuming data searches, long loading times and complex data management.

JiveX Enterprise PACS, simply a well-rounded thing.

RADIOLOGY SOFTWARE SOLUTIONS

JiveX ENTERPRISE PACS

Secure Archiving and Efficient Reading

The JiveX Enterprise PACS offers all the necessary components to report images quickly and efficiently for the best diagnostic outcome.

JiveX is characterised by a high level of interoperability, scalability and performance.

JiveX PACS is your reliable partner in all things radiology, *simply a well-rounded thing.*

INTEROPERABILITY AND WORKFLOW

Consolidating and delivering radiology data

JiveX is based on recognized standards to enable an easy setup of high performance IT scenarios

- Systematic support of all radiology-relevant IHE profiles using recognized standards (DICOM, HL7)
- Vendor-neutral link to all imaging modalities
- Integration of non-DICOM data via conversion gateways (e.g. JPGs, videos, ECG data)
- Quick access to specialized software from JiveX, i.e. from the reading environment
- Facility-wide access to data via a single MPG-conforming viewer
- Simple and bidirectional links to HIS and RIS

ARCHIVING AND SECURITY

Managing and archiving radiology data

JiveX stands for smart, secure and modern archiving approaches

- Vendor-neutral and audit-proof archiving
- Hierarchical archiving and rule-based data replication
- Fail-safe design
- Support of various long-term solutions

VARIETY AND DEPTH OF FUNCTIONALITY

Reading and processing radiology data

JiveX includes various functionality making readings quicker, safer and more comfortable for the radiologist

- Intelligent hanging protocols
- Multimodal viewing
- Modern and award-winning user interface design
- Support of intradisciplinary and interdisciplinary cooperation with calendar-based demo solutions
- Specialized solutions for mammography and tomosynthesis
- Fast image loading and high performance post processing
- Efficient postprocessing options, e.g. MPR, 3D volume rendering, image registration and vascular analysis

COMMUNICATION AND NETWORKING

Sharing and distributing radiology data

JiveX offers several networking options that enable efficient work across facilities

- Group solutions to link several sites
- Diagnostic-grade image distribution via JiveX Web (zero footprint)
- Allows facility-wide and cross-facility cooperation, including referring physicians (e.g. via web link)
- JiveX Mobile to work and read on mobile devices
- Compliant telemedical solution and data exchange via DICOM E-Mail
- Data communication via IHE-XDS
